Office Action Summary	Application No. 10/591,971	Applicant(s) TOSHIMA ET AL.	
	Examiner Sharidan Carrillo	Art Unit 1792	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-11, drawn to a substrate processing system.

Group II, claim(s) 12-20, drawn to a substrate processing method.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The special technical feature of Group I is the first inert gas supply line for carrying a heated inert gas connected to the processing gas supply line. The special technical feature of Group II is a processing liquid changing step of replacing the chemical contained in the processing tank with a rinsing liquid. Since the special technical feature of Group I is not present in Group II claims and the special technical feature of Group II is not present in the Group I claims, unity of invention is lacking.

3. Furthermore, the apparatus and method claims of Group I share a common feature of a processing tank and a drying unit disposed above the processing tank. The common feature does not definite the "special technical feature", since the claimed feature does not define a contribution over the prior art, as evidenced by Toshiba

(JP2001-144065) or Tanaka et al. (JP07-130699). Accordingly the common feature, as recited in the apparatus and method claims are not considered as "the special technical feature" as defined by PCT Rule 13.2. Where a group of inventions is claimed in one and the same international application, the requirement of unity of invention referred to in Rule 13.1, shall be fulfilled only when there is a technical relationship among those inventions involving one or more of the same or corresponding special technical features. The expression "special technical features" shall mean those technical features that define a contribution which each of the claimed inventions, considered as a whole, makes over the art.
